Katie,

Will you research this with Robin and whomever else might know where to start. Then, speak to Dorothy and Peter. Then, Thor if still no good action plan. Then, myself as a last resort or to check in.

Thanks. Oh yeah, you may want to contact this person at the Tulalip to let him know what we are doing to meet his needs.

Thx

W

Wally, this is the request from the Tulalip Tribe regarding their rule authorized wells. I searched for the final documents and was never able to find them to tell him what is required. The information that I found is in the boxes that I left in your office.

I will tell Mac that he should contact you for further information.

While I'm getting the files sent to me in Olympia and sorting through them a few questions have come to mind. From what I've seen so far the Tribe has agreed to monitoring for various things. Has that monitoring occurred? Have

reports been sent to us? If so, do you remember who they were sent to? If they haven't been sent could you please send me the report to the address below?

This will help us document that the Tribe is in compliance and meeting Safe Drinking Water standards.

As I get more into the file I'll let you know.

Robin

Tribes Class V injection well: authorization by rule

AM

Thanks for the responses. The application-by-rule that we made provided for no specific reporting regimen or format. I checked your collective EPA web sites for forms: only to confuse the issue. All of your existing forms were very generic in nature. We want to report in whatever form or style that you choose.

T. McKinsey

Hi, I just left you a voice mail and wanted to confirm by email that I will be reviewing the file on this well to see what it is we are requesting from you. I will be calling you or emailing you either late this week or early next week.

If you have questions please call me at 360/753-9082.

Robin: I spoke with Thor about the message below on Wed. He said this project was passed to you. I want to submit our annual report in a few days and am struggling to get the right forms. Please advise which form meets your requirements.

Subject: Tulalip Tribes Class V injection well: authorization by rule

Thor: Ref your Mar 17, 2003 letter authorizing Tulalip's Class V well for its MBR water treatment plant, as you are aware the MBR plant and UIC began operation on June 6, 2004. It is time for their annual report/inventory.

We are somewhat confused about the Form for the report. We find several Forms on EPA' HQ, Region 10 and referenced OMB web sites reported to be correct vehicle for this report. The forms are:

1. EPA Form 7520-11; Annual disposal/injection well monitoring report 2. Underground discharge system (Class V) Inventory Sheet - No number 3. OMB 2040-0042 Injection Well Monitoring Report (three very different versions on the web sites)

What Form # or title is your preference for our reporting? Also, we are assuming the reporting is at the anniversary of the one year start date, and not fiscal or calendar. If we are incorrect, please advise.

Also, since your name was referenced on Tim Hamlin's Mar 17 letter and on Reg X's current web page, are you our contact. If not, excuse this message and please pass it to the correct person or office.
